

ISO26825:2020 compliant syringe labels for critical care anaesthetic drugs

Responding to the need for quality labels that are true to the ISO Pantone colours and provide optimum performance, Rainbow Labels are printed on specialist PharmaTight FSC paper offering superior adhesion for all sizes and types of syringe.

Printed in the UK using genuine Pantone colours to exactly match the colours in Rainbow Trays and the ISO guidelines using crisp legible fonts for immediate drug recognition.

Rainbow Label dispensers are designed for automatic single label dispensing in a hygienic and transparent box that easily stacks. Each roll is supplied in convenient PVC/latex-free recyclable clamshells for quick and easy storage and dispensing.

Our dedicated customer service provides bespoke and personalised printing for all label requirements. In addition to the extensive catalogue of over 500 designs, Rainbow Labels specialises in supplying compliant labels in any language supported by our team of designers and printers.
